Eval. Notes:	On 1/22/15, Amy Scaffidi (NJDEP-Bureau of Compliance and Enforcement) and I (Carol Carman) conducted an investigation at Thermal Energy Midtown Control Center, which is located at 1825 Atlantic Avenue in Atlantic City, NJ. Thermal Energy has been assigned Program Interest # NJN986645224 at this location. On this date, we met with Patrick Towbin (Vice President/ Asset Manager for Pepco Energy Services), who escorted us throughout the plant. Thermal Energy is a division of Pepco Energy Services. This co-generation plant burns natural gas to provide electricity, heat and cold air to various casinos and to the public within Atlantic City. The plant also provides approximately 42,000 gallons per minute of chilled water to the City of Atlantic City. During the co-gen process, anhydrous ammonia (stored under pressure) is injected into three boilers and passed over a catalytic plate of metals to reduce knocking and air emissions (similar to automotive engines). Thermal Energy has been issued Program Interest # 70322 by the NJDEP Air Program. No hazardous waste is currently being generated or accumulated at this location. Oily rags and solvent contaminated rags used during maintenance activities are removed by the contracted companies that perform services on equipment. No universal waste or used oil was being accumulated on-site at the time of the inspection. No hazardous waste, universal waste or used oil violations were noted.
